

ConVox

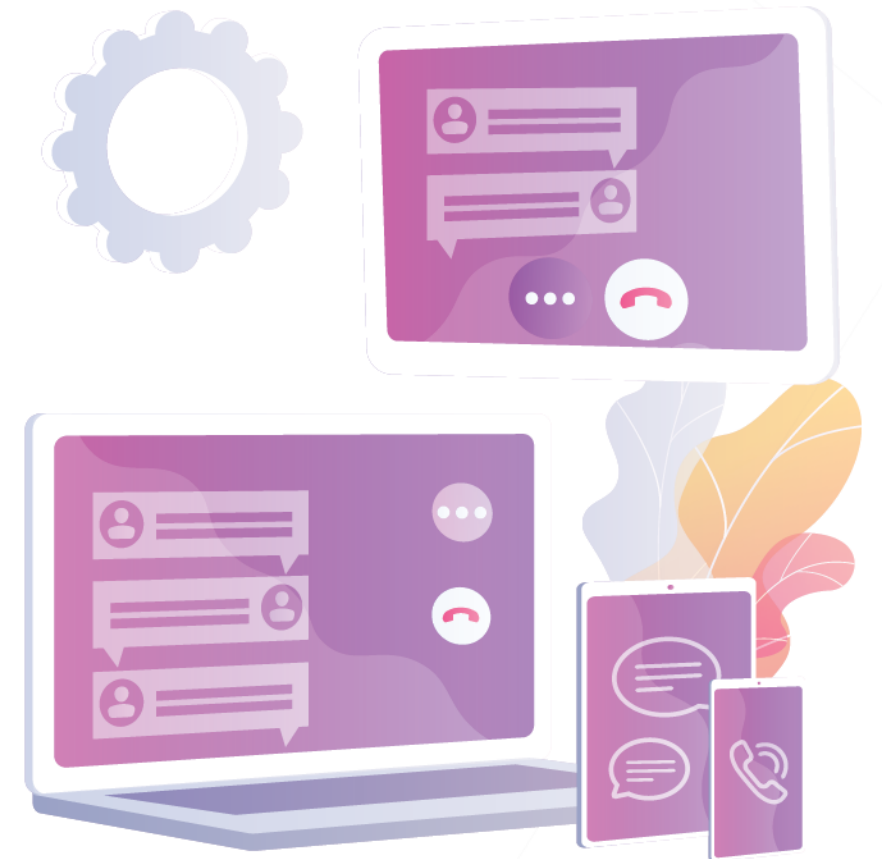

AUDIO CONFERENCE SOLUTION

A CONFERENCING SOLUTION THAT KEEPS YOU
CONNECTED WITH MAXIMUM FLEXIBILITY.

| AUDIO CONFERENCE SOLUTION

The audio conference is a solution where people in different locations use conferencing technology to hold an audio call. The participants can dial into a central system and get connected to the call. Audio conferencing aims at achieving communications and collaboration. Audio conferencing is smart and reliable than traditional calling solutions.

AUDIO CONFERENCE BENEFITS

Put together an online meeting and invite participants to join call without operator's help

Conduct a reservation less audio conference calls and web conferences at 24/7

Make your workplace mobile where your people can log in from anywhere and join the conference.

Reserve a self-service tele-conference call and have the ability to dial in at your scheduled time

All Conferencing offers the same dial-in number and Access code for every conference you conduct.

Cut disruptive background noise during presentations

ConVox
